

POTS LINE REPLACEMENT POWERED BY LTE NETWORKS

Quickly replace your old copper phone lines while **reducing expenses** and getting better **visibility, support, and security** on an **unlimited LTE network**.

Maintaining plain old telephone service lines (copper wiring or dial-up) is increasingly costly, and those rising costs are being passed on to customers by service providers. The FCC is also phasing out POTS lines and not requiring service providers to continue service during 2022.

What Uses a POTS Line?

- » Voice Lines
- » Fax Lines
- » Elevator Phones
- » Credit Card Machines
- » ATMs
- » Gates & Doors
- » Panic Buttons
- » Alarm Systems
- » Meter Reading
- » HVAC Systems
- » SCADA
- » Applications
- » Emergency Call Boxes
- » Fire Alarms

Our NOC **notifies, identifies, and provides instant support** to get you back up. **Future-proof your tech with no infrastructure updates.**

Reduce Expenses
(overwhelming majority of scenarios)

Increase Uptime
(and Reduce Your Liability)

Improve Support & Monitoring
(Proactive Support & Cloud Platforms)

Gain Visibility & Management Tools For Your System

Maintain Service During Power Outage
(Battery Backup Included)

Prevent Data Overages
(Unlimited Data Included)

Future-Proof Your Technology
(POTS Networks Phasing Out)

Approved Fire Alarm Connectivity Solution

CONVERT EXISTING INFRASTRUCTURE TO THE FAST & RELIABLE LTE NETWORK

POTS Link converts your existing analog phone line wiring signal into a wireless connection in a simple, all-in-one solution.

By harnessing the power of data, POTSLINK delivers the connectivity and intelligence needed for secure, compliant, and more efficient fire system management with an LTE solution.

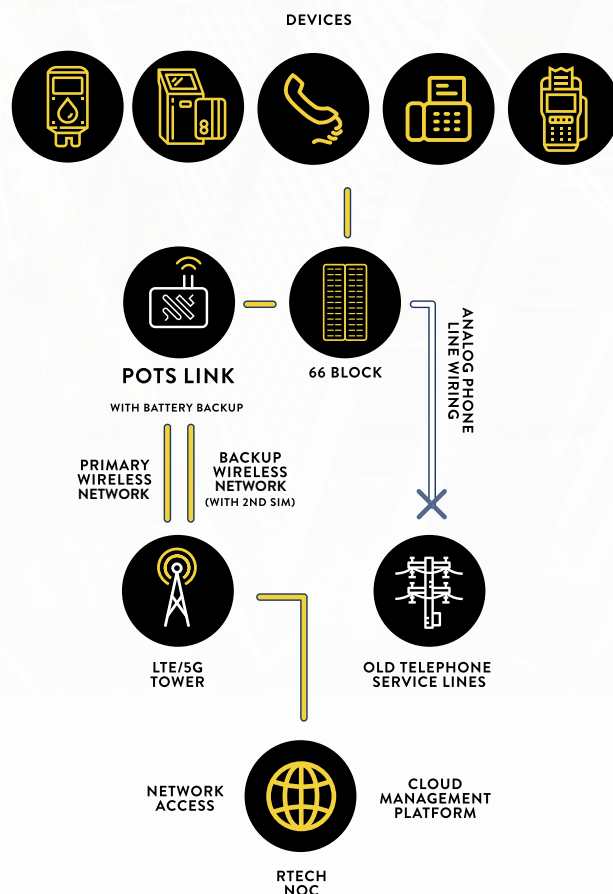

HOW MUCH COULD YOU SAVE?

POTS Link scales with your needs, supporting up to 8 concurrent lines per kit with unlimited data.

The typical cost savings are between 20-50%.

A major university needed a modern solution, more support, and most importantly, cost savings on their telecom expenses.

After converting their POTS lines with a POTS Link, they save \$2,700 every month while getting better service.

KEY BENEFITS

1. All Carriers, One Simple Bill
2. Secure Wireless Data Connectivity
3. 24 / 7 / 365 Managed Device & Data
4. Data Usage Analytics & Reporting
5. Fixed, Low Monthly Cost

ALL BUNDLES INCLUDE

● **INDUSTRY-LEADING HARDWARE**

● **CROSS-CARRIER DATA POOLING**

● **ENTERPRISE-CLASS I.T. SUPPORT**

● **CLOUD DATA MANAGEMENT PORTAL**
